Custom Post Types Editor is a WordPress plugin that allows you to create your own custom post types or let you edit existing ones. With it, you can create any number of custom post types according to your needs without having to touch your website code. Custom post types can be added and edited without using any code or web interface, they can be assigned to different pages and displayed on different pages, and you can also change the settings to add new ones. Installation is simple and painless: you only have to upload the Custom Post Types Editor plugin to your WordPress system, activate it and start using the new post type. With Custom Post Types Editor, the tasks of creating custom post types are simplified. You can leave the whole process to Custom Post Types Editor, and it will take care of it. Additionally, you will not need to edit your website files, just upload the plugin files into your WordPress files. You can display each custom post type in a separate page as well. To publish the new custom post type, all you need to do is click on the publish button and take a look at your WordPress dashboard. You are ready to go. Note: Custom

Post Types Editor supports all WordPress versions. A lot of settings can be applied to custom post types such as slug, title, description, priority, and so on. There are separate fields for each option, so you can easily edit the custom post types you want to see on your site. You can define the categories used to display the custom post types, the number of posts allowed in each category, the order in which they appear, the tags used to display them, and much more. Custom Post Types Editor also allows you to add custom fields to each custom post type. This is helpful in case your custom post type needs to be more flexible. You can also let the plugin search the active posts to display on the home page. This means that you can also limit the number of posts in each custom post type. Before anything else, let me congratulate you on your hard work. You are a true hero. It is a lot of work, but you have a lot of support. Thanks. Features: > Custom Post Type Editor is a WordPress plugin that offers a simple method to create, edit or delete custom post types without creating new custom post types, without writing any code and without editing your website files. > You can create as many custom post types as you want. > You can edit your custom post types without editing

It can be traced to 1720, when botanist Peter L. Sprengel (Spänkel) used the term "eheringia" for plants in this group. It is first attested in English in 1724. In 1762 the name was changed to Eugenia in honor of the botanist Johann Heinrich Friedrich Link (1723–1775), after whom the genus was named. In 1768 the name was changed to Sprengelia, but in 1796 it was changed to Orchis. British Flora published in 1731 the first edition of Kew's Icones Plantarum, which for the first time used the new name Viridiflora for the subtribe Orchidinae (s.l. Orchidaceae) having small corollas and a
